

Test Plan

1. The Crime Hub page has a hyperlink to the home page
2. When you login as a common user, you will see currently loading the data, and then after a while you will see Select any of the options below to view crime data. Now there are three buttons showed, and you can click on them.

3. When you login as administrator, you will see an upload button with the normal three other buttons.
4. Table's filters are persistent with the map. The filters are built on each other. For example, you have a date range filter and crime type filter, and then the crimes showed will be the crimes fitted to date range filter and crime type filter.
